

Managed Enterprise Video

Digital Media Solutions

DISH Network® Digital Media Solutions makes business video easy by delivering all the technology, transport, and professional services necessary to deploy a comprehensive enterprise video network. With DISH Network Managed Enterprise Video, organizations with networks of any size can easily and cost-effectively deliver high-impact video to PCs, televisions and flat panel displays positioned throughout the enterprise.

Simply stated, enterprises with private business video networks have an edge over the competition. Executives can reach one employee or all employees instantly with video-based communications. The same network can also be used for publishing dynamic distance learning, human resource training and corporate communications content.

Efficiently Deliver High-Quality Business Video

Often the enterprise LAN/WAN network can't handle HD-quality video, significantly limiting management's ability to communicate effectively. With DISH Network Managed Enterprise Video (powered by ActiVia® technology), HD-quality video can be delivered live or pre-positioned across the enterprise network much more efficiently by using patented "Smart Delivery" technology.

With DISH Network Managed Enterprise Video, users can quickly and efficiently deliver live and on-demand video content via reliable, scalable unicast or multicast distribution—all coordinated and scheduled through a simple web portal interface. Distribution events are automated and easily managed. This highly reliable, redundant customer solution with dedicated receiving devices at each remote location is all expertly managed by DISH Network.

A Holistic End-to-End Solution

DISH Network does it all with this end-to-end solution that can grow and scale to your business needs. DISH Network designs, deploys, operates, and manages the enterprise video solution with the dependability expected from a technology leader. The service includes all necessary hardware, software, service and training. The DISH Network Managed Enterprise Video solution allows organizations to:

- Distribute up-to-the-minute, mission-critical information
- Enhance organizational communications
- Educate and entertain customers and associates
- Broadcast special events/townhall meetings
- Improve business agility and a sense of teamwork
- Communicate with customers at branch locations

Why DISH Network Managed Enterprise Video?

*Reduce Drain on Resources,
Meet Mission-Critical Communication Needs*

Experience the benefits of a private video network without stressing your IT department. Building on DISH Network's legacy of networking expertise, Managed Enterprise Video makes enterprise video simple and cost effective, ensuring real impact across the organization. All members of the organization can be "on the same page" regardless of their location or access to technology, improving morale and job satisfaction. Managed Enterprise Video can also be established within customer-facing store locations to optimize the customer experience and enhance customer and associate communication.

Let DISH Network handle the complex task of implementing and managing the infrastructure so that you, the user, can focus on the message, not the medium.
